

Fiber Laser Cutter

## Processing Size 1500x3000mm

RayExpress 1530 Fiber laser cutting machine is a laser processing solution that is professionally used in metal processing, aerospace, electronic appliances, home appliances, elevators, automobiles, advertising, precision accessories, craft gifts and other manufacturing industries. The equipment is designed with a gantry double drive structure, which is dual gear rack and dual servo motor drive system with high-speed arc cutting function, that can effectively meet the application requirements of metal materials such as carbon steel, stainless steel, aluminum plate, galvanized sheet, etc.

#### **Features**

- High Rigidity Enhanced Aviation Aluminum Gantry, improve the gantry strength and rigidity and much lighter;
- Finite element analysis of gantry help to achieve the best critical state of dynamic performance;
- Integrated structure design, reasonable overall layout
- Rack and pinion structure, servo drive, secondary annealing treatment of high rigid welding frame with high accuracy and stability
- Professional laser cutting software with graphic layout and sharp corner smoothing functions, fast piercing & cutting;
- Fiber laser has better Industry-leading wall-plug efficiency (around 30%), less power consumption;
- Hand controller is available, easy for operation;

#### Technical Data

| Item                            | Specification                           |
|---------------------------------|---|
| Working area                    | 1500mm x 3000mm                         |
| Laser power                     | 1000W~4000W                             |
| Transmission system             | Double rack & pinion and servo drive    |
| Maximum speed                   | 60m/min                                 |
| Positioning accuracy            | ±0.03mm/1000mm                          |
| Repositioning accuracy of clamp | ±0.02mm/1000mm                          |
| Format                          | DXF, NC                                 |
| Working environment             | 0-45°C , Humidity ≤ 80%, non-condensing |
| Equipment power                 | 8KW (Laser and chiller not included)    |
| Power supply                    | Three phase 380V/50Hz or 60Hz           |
| Total weight                    | 3000Kg                                  |
| Overall size                    | 5010mm×2260mm×1900mm                    |

### Configuration

| Item                          | Specification   | Brand                   |
|-------------------------------|---|-------------------------|
| Machine Body:                 |   |                         |
| Square tube welding frame     | Large gantry finish milling, double annealing               | RayOpen                 |
| Linear guide rail             | Imported precision grade                                    | RayOpen                 |
| Rack & pinion                 | Imported high speed and high precision                      | LEITESEN-Germany        |
| Planetary reducer             | Imported high precision                                     | MOTOVARIO-France        |
| Gantry                        | Finite element optimization, light weight and high rigidity | RayOpen                 |
| II Laser source:              |   |                         |
| Power                         | 1000W~4000W   | IPG                     |
|                               |   | (Maxphotonics optional) |
| III Optical system:           |   |                         |
| Laser cutting head            | Auto focus  | Raytools-Switzerland    |
| IV Control and drive system:  |   |                         |
| Motion Control System         | Professional motion control system for laser                | Raytools-Switzerland    |
|                               | cutting including CAM software                              |                         |
| Motor                         | X-axis servo motor: 1KW, 2000rpm                            |                         |
|                               | Y-axis servo motor: 1.5KW, 2000rmp                          |                         |
|                               | Z-axis servo motor: 400W, 3000rpm, with brake               |                         |
| Electrical control system     | Electrical components are international brands              |                         |
|                               | such as Schneider   |                         |
| Industrial computer           | I5-4200U/8G/120G/WIFI                                       |                         |
| V Accessory:                  |   |                         |
| Cooling system                | Double circulation system, over temperature                 | S&A                     |
|                               | alarm, flow protection, water level protection              |                         |
| Exhaust blower                | 380V/50Hz or 60Hz/3KW/2900rpm                               | RayOpen                 |
| Pneumatic components          | Pressure regulating filter, solenoid valve, check           | Taiwan/Japan            |
|                               | valve, etc.   |                         |
| Precision electronically      | 0~1MPa  |                         |
| Controlled proportional valve |   |                         |
| Optional: Voltage stabilizer  | 30KVA or 60KVA  |                         |
| Optional: Air compressor      | Air compressor & IV degree filter system & dryer            |                         |
| Optional: Dust collector      |   |                         |

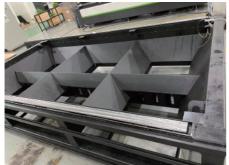

Fiber Laser Cutter

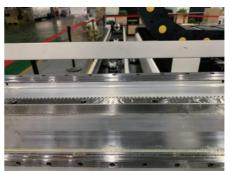

Processing Size 1500x3000mm

#### Core part-structure

- High Rigidity Enhanced Aviation Aluminum Gantry, improve the gantry strength and rigidity and much lighter;
- Finite element analysis of gantry help to achieve the best critical state of dynamic performance;
- Integrated structure design, reasonable overall layout

#### Core part-moving system

- Hand controller is available, easy for operation;
- France brand Schneider drive & servo motor & France brand MOTOVARIO reducer & Germany rack
- Gantry double rack & pinion, double servo motor transmission structure, high inertia and large torque output
- The maximum acceleration can reach 0.8G, which effectively improve the customer's production efficiency

#### Core part−electronic & gas parts

- Schneider electronic parts and Japan brand SMC electrical proportional valve ensure the long time and stable operation.

#### Core part-self-lubrication system

- self-lubrication system will run automatically

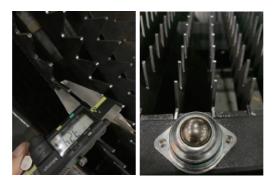

Fiber Laser Cutter

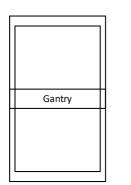

Processing Size 1500x3000mm

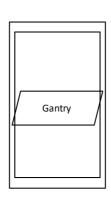

#### Core part-special design

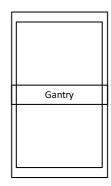

- 3mm thickness blade strip table
- Ball design will make it easily loading metal sheet material

#### Gantry Deviation Self Correction

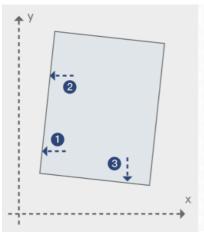

### Edge Search

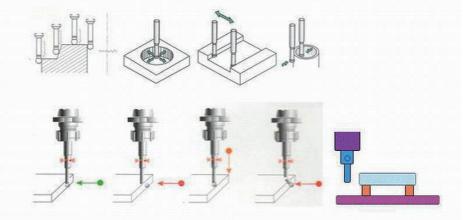

To position the metal sheet edge on the working table which is not consistent with the X / Y coordinate, the cutting head can be quickly determined by the Edge Search function to improve the processing efficiency.

Fiber Laser Cutter

Processing Size 1500x3000mm

### **Cutting Ability**

(for reference only, the real cutting speed depends on material and gas)

| Material | Thickness(mm) | @1500w<br>Speed (m/min) | Gas |
|----------|---------------|-------------------------|-----|
|          |               |                         |     |
| CS       | 1.5           | 19.2                    | 02  |
| CS       | 2             | 8.4                     | 02  |
| CS       | 3             | 4.8                     | 02  |
| CS       | 4.7           | 2.1                     | 02  |
